

Hathaway Solutions - Project Profile

HEDNA Membership Renewal:

Hathaway Solutions was selected to build an online system for HEDNA member organizations to renew their memberships over the Internet. The application involved the development of a web enabled database pulling member information from an existing database. Having multiple levels of membership and corresponding dues schedules, the connection between the web renewal application and the existing member database was critical. Hathaway Solutions provided additional services as part of the HEDNA web site improvement project including the creation of a standard template and site navigation.
