

Hathaway Solutions - Project Profile

HSNH Web Site:

One of the secondary business units of Hathaway Solutions is the installation and setup of home networks. This business unit offers a very different service from that of the main corporation and as such required its own unique web site. The web site was designed and developed internally by Hathaway Solutions. The calculator that is located on the web site allows customers to easily estimate the total cost of a home networking solution. The development cycle included enhancements to support Search Engine Optimization and submission. Hathaway Solutions also provides a secure hosting environment for the HSHN web site.
