

Hathaway Solutions - Project Profile

Wellington House Web Site:

Hathaway Solutions was selected to rebuild the web site for the Wellington House after it was lost by a previous service provider. Management at the Wellington House was pleased with their old site design, so the goal for Hathaway Solutions' staff was to build a site very similar to what they originally had. Hathaway Solutions was able to take this layout and expand on the site design to include additional photos and content areas. As part of the project package, Hathaway Solutions is able to provide a shared hosting environment for the Wellington House web site.
